WORK EXPERIENCE

Local Startup Company | Intern Front-End Developer

Feb 2024 - May 2024

- Collaborated with the team to develop responsive and user-friendly web applications using **React, JavaScript, and TailwindCSS**.
- Assisted in building reusable UI components and ensuring cross-browser compatibility.
- Gained experience in debugging and optimizing front-end performance to meet project requirements.

Freelance, Upwork | Front-End Developer

Nov 2024 - Present

- Designed and delivered high-quality web applications for clients using Next.js and TypeScript.
 - Integrated modern tools such as Supabase and Prisma ORM to develop scalable backend solutions.
 - Created dynamic interfaces with TailwindCSS and ShadCN, focusing on usability and accessibility.
-

PROJECTS

Fullstack Personal Portfolio with Guest Note

- Built a professional portfolio to showcase skills, featuring a guest note section.
- Integrated Supabase for real-time database functionality and Prisma ORM for data management.
- Tools Used: Next.js, TypeScript, Sanity CMS, ShadCN, TailwindCSS
- Deployed on Vercel for fast and seamless performance.

Modern SaaS Landing Page

- Developed a sleek SaaS landing page with clean, responsive design using Next.js and TypeScript.
- Styled the project with TailwindCSS to ensure modern aesthetics and responsiveness.

Simple CRUD Application

- Built a CRUD application with user authentication and dynamic data handling.
 - Integrated PostgreSQL for database operations and Kinde for authentication services.
 - Tools Used: Next.js, TypeScript, TailwindCSS, ShadCN, PostgreSQL.
-
